The Art of Creative Group Work
創造的なグループワークの技術と環境
東北大学 創造工学研修 2019

Masashige MOTOE Laboratory
motoe@tohoku.ac.jp
October 10, 2019 -

Creativity will appear not only on the inspiration of genius individual but on the continuous effort of group. This workshop is focused on the way to manage a process of creative group work, to set up an appropriate workplace and to prepare tools that you need. Through an experimental project, we consider about the premises, produce the work results, record the process with multimedia, evaluate the achievement and find some practical patterns of relations between a process of project and its environment.
