

Can life be understood by computers?

- Introduction to Bioinformatics in the Reiwa era

1%

“It is known that genomic differences between human and monkeys is just one percent in terms of DNA sequences. However, can we tell how the one percent sequence difference differentiates human from monkeys?”

- Data analysis by Python
- Genome analysis/Protein analysis

Laboratory of Systems Bioinformatics
(Kinoshita-Obayashi-Nishi Lab.)

Research Building #3 -Electrical
Engineering and Applied Physics
Room 506
