

# Seismic damage and countermeasure of structures/ground

**Instructor:** Prof. Shotaro Yamada (022-795-7126, [shotaro.yamada.d2@tohoku.ac.jp](mailto:shotaro.yamada.d2@tohoku.ac.jp))

Assoc. Prof. Akiyoshi Kamura (022-795-7433, [akiyoshi.kamura.a4@tohoku.ac.jp](mailto:akiyoshi.kamura.a4@tohoku.ac.jp))

**Opening meeting:** October 1, 4:40 pm

**Room:** Building of Civil Engineering and Architecture (F01), Room 401  
Geosphere and Geotechnical Engineering Laboratory

As is well known, Japan is located in a seismogenic zone.

Earthquakes occur in Japan every year. This lecture thinks about the seismic properties of infrastructures and ground through some simple experiments and numerical simulations.

Liquefaction disaster
