

Feel magnetic force and field !

Department of materials science,
ON. Tezuka, M. Matsuura

In this course, you feel magnetic force or field, and learn how to sense such field. You investigate ①magnetic materials which provide it, and magnetic sensors which convert into numerical value. You will discuss how to obtain high performance such materials and devices.

① Feeling magnetic field, and investigation of magnetic materials

② Investigation of magnetic sensors

First lecture : 1st, October, 16:30~
