

Hands-on Creation of Body-Friendly Soft Materials

Instructor : Assist. Prof. Aki Kashiwazaki (Tel: 022-795-7229, aki_kash☆tohoku.ac.jp)
Prof. Masaya Mitsuishi Swap ☆ for @

This program carries a study of soft materials with related to various scientific fields such as biomedical science, environmental engineering, and materials chemistry.

In this project, you'll design and examine soft gels and polymers that have an affinity to water and biological systems to understand the relationship between materials structures and their function.
