About Teijin Group

Toward the fulfillment of its Long-Term Corporate Vision of "To be a Company that Supports the Society of the Future," the Teijin Group has implemented various initiatives to create growth platforms, including proactively allocating resources to the three solutions of Environmental Value Solutions; the Safety, Security, and Disaster Mitigation Solutions; and the Demographic Change and Increased Health Consciousness Solutions and strengthening the management base to drive innovation, in line with its Medium-Term Management Plan 2020-2022: ALWAYS EVOLVING. In the Materials Business Field, we are striving to shift to a business model focused on providing customers with solutions, including high-performance and lightweight materials for mobility applications, and we are proactively investing in endeavors to achieve carbon neutrality. In the Healthcare Business Field, we have acquired the sales rights for diabetes treatments, and therefore built the foundation for expanding our services to contribute toward preventing lifestyle-related diseases and their development, and we have also embarked upon the regenerative medicine business, which integrates the Teijin Group's technological bases in healthcare, materials and engineering.

Meanwhile, it is still uncertain when the global COVID-19 pandemic, which began to spread worldwide in 2020, will be over. The world is experiencing a global shortage of semiconductors, a sharp rise in materials and energy prices, disruptions in logistics networks, and heightened and realized international political and geopolitical risks. These factors have had a certain impact on our businesses, and mainly on the Materials Business Field. Fiscal 2022, the final fiscal year of our Medium-Term Management Plan, is an important year in which we should not only make a full commitment to achieve the goal of creating growth platforms, but also design the next Medium-Term Management Plan and draw a picture of the future with a sense of speed. We will conduct a fact-based review of the achievements and results we have produced so far from the perspective of what we have successfully done and what we have not done. We will also take a fresh, careful look at our purpose in a society filled with drastic changes and uncertainties, and seriously address real issues and the pain that society and customers are now facing. By doing these things, we aim to transform our business models to those that are focused on delivering solutions. We believe that accomplishing this aim will require the Teijin Group to create an organizational structure and corporate culture that facilitates innovation, and to unite to form a strong team. To bring happiness to all stakeholders, we will make Group-wide efforts, with our purpose as the starting point, to be a company that can continue to provide value with solutions to material issues (materiality).

Overview of the Teijin Scholarship Foundation

Teijin Ltd. Founder.
Seita Kumura
(1880-1951)

The Teijin Kumura Scholarship system was started to commemorate the 35th anniversary of Teijin Limited's founding in 1953 and to honor the achievements of Seita Kumura, who established rayon manufacturing technology in its own right and is known as the "father of the Japanese rayon industry". The purpose of this Scholarship system is to cultivate young engineers and scientists who would succeed to and develop Mr. Kumura's spirit of creative R&D and contribute to the development of our nation and society and the creation of culture. In July 1954, the company established the foundation "the Teijin Scholarship Foundation" for the scholarship system in order for the further development of the system. With its transition to public interest incorporated foundation, it has been accredited by Prime Minister in October 2011. The essential spirit that has permeated the system since its establishment has not changed. The system is not run for the sake of one company and takes as its central aim the cultivation of the human resources that will be responsible for the development of national society. Because of this aim, recipients of scholarship loans are excused from repayment if they are involved in research at a university or public laboratory after graduation. In addition, scholarship loans are recognized if an applicant has done well at school, irrespective of economic conditions, etc., in order to cultivate the researchers who will be responsible for the science and technology of the future. Furthermore, since its founding, this system has never set mandatory restraints and has firmly maintained the essential qualities of the foundation. Until this point, about 1,600 people have been active in university research organizations and private companies.

1. History

June 1953

Teijin Limited established an educational scholarship system as a project to commemorate the 35th anniversary of the establishment of the company.

July 1954

The Education Minister permitted Teijin Limited to establish the Teijin Scholarship Foundation. The foundation continues to the present day.

October 2011

With its transition to public interest incorporated foundation, it has been accredited by Prime Minister.

2. Aim

The foundation aims to cultivate human resources who will become aware of their mission as scientists and engineers and be responsible for the development of our nation and society and the creation of culture.

3. The Origins of the Names "Teijin Kumura Scholarship" and "Teijin Kumura Scholar"

The scholarship awarded by the foundation was named the "Kumura Scholarship" and the recipients of the scholarship "Kumura Scholars" in order to honor the achievements of Seita Kumura, who was the first person in Japan to establish rayon manufacturing technology and subsequently built the foundations for the development of the rayon industry, and to communicate those achievements eternally to later generations. To mark the 50th anniversary of this scholarship system, they have been renamed the "Teijin Kumura Scholarship" and "Teijin Kumura Scholars" respectively.

4. Project Details

Teijin Kumura Scholarship loans are awarded to graduate school students in technology-related disciplines.

"Young people go overseas!"

~ Message from a Nobel Prize Laureate in Chemistry (2010) Dr. Ei-ichi Negishi ~

When I joined Teijin in 1958, Shinzo Oya the president at that time told, "Young people must go overseas. You will be able to speak three languages in 30 years, if you learn one language in 10 years. Then you will become world-class talent." The starting point that I was able to walk on such a way is in the word of President Oya.

In the field of chemistry, the competition is worldwide, and our playground has extended across the world. Now, you have to look for the professor from the world and aim for the top in the worldwide competition. For the young people like you, I suggest you to go overseas aggressively.

When you find your own "Dream", please challenge it thoroughly until the truth is investigated. I look forward to your great success in the future.

*This message was contributed in November 2013.

Tips on Applying for Scholarships

Education and Student Support Department

Student Exchange Division

International Education Section

2019.02.01

1. Before applying

- Read the application guidelines carefully to determine whether or not you meet the requirements. Be sure to take note of any obligations for scholarship recipients in addition to the application requirements and details of the award. (E.g. mandatory attendance at conferral ceremonies and exchange events, submission of periodic assignments to the scholarship organization, etc.)
- Make sure you have all the required documents on hand. In particular, many students forget to submit academic transcripts from their previous curricula.
- If you have applied to other scholarship organizations via either university recommendation or direct application, you cannot apply for any further scholarships, even if you do not yet know the results of your other applications. (Except in cases where both scholarships permit receipt of multiple scholarships at the same time.)
- Screening methods vary depending on the organization. If there is an interview, note the travel expenses, location, date/time etc., and be sure you will be able to attend.

2. Application documents

- Do not reuse documents from previous applications, even if you are applying to extend a current scholarship. Always prepare new documents.
 - Do not use erasable pen (e.g. Frixion); always fill out application forms with a black ballpoint pen. (Application documents written in erasable pen cannot be submitted to the scholarship organization.)
 - During the screening process, your application documents will greatly influence the impression you give. Fill out all forms neatly so that they are easy for the evaluators to read.
 - If you make a mistake, do not use corrective tape/fluid or cross out the mistakes. Prepare a new form instead.
 - Do not abbreviate your undergraduate/graduate school's name; enter the full name.
 - Be sure to read and follow all notes and instructions on filling out the forms.
 - As a matter of courtesy, fill in at least 70-80% of the space provided for each short-answer/essay question.
 - After you have finished, double check your application to make sure that no items are blank. In particular, enter answers even for items not applicable to you, e.g. "None" (or "0" for amounts) etc.
- *If outputting data from Excel, check to make sure all characters fit within the provided spaces.

3. Other

- If you have any questions about the application requirements or how to fill out the forms, please inquire with the person who handles scholarships for your department. Do not try to individually contact the scholarship organization.
- Note that recipients of the President Fellowship or other scholarships that pay tuition may not be able to apply for a tuition exemption for the duration of that scholarship. Be sure to check with the person who handles scholarships for your department.
- If you plan to apply for a scholarship directly (without going through the university), or to extend a scholarship, you must contact the person who handles scholarships for your department and inform them beforehand.

*This form does not need to be submitted, if you have submitted anytime in **October 2022 or thereafter**.
